

Tai Nguyen *Senior Full-Stack Engineer*

✉ tainguyen072ca@gmail.com ☎ +1 850 655 3996 📍 Garden Grove, CA 92843

Summary

Senior Full-Stack Engineer with 8+ years of experience building and scaling production-grade web applications using a TypeScript-first stack, including React, Next.js, Node.js, and NestJS. Strong expertise in designing scalable backend services, background job systems, and cloud-native architectures. Experienced in delivering high-impact features that drive user engagement, performance, and business growth, such as real-time communication, semantic search, and complex workflow automation. Brings solid Python experience as a complementary skill, contributing to backend services, data processing, and automation when needed. Recognized for elevating code quality through code reviews, mentoring, and ownership of production deployments, while collaborating closely with product and design teams to translate complex requirements into reliable, maintainable solutions.

Technical Skills

FullStack Development — React, Next.js, Remix, Vue.js, TypeScript, JavaScript (ES6+), Redux, Zustand, Vuex, Tailwind CSS, Material UI, Responsive Design, Performance Optimization, Accessibility (WCAG)

Backend & Databases — Node.js, Express.js, NestJS, Python(Django, FastAPI), REST APIs, GraphQL, PostgreSQL, MySQL, MongoDB, Redis, Firebase (Auth, Firestore, Cloud Functions), Supabase (PostgreSQL, Auth, Storage)

Cloud, Devops & Architecture — AWS (EC2, S3, RDS, Lambda, CloudWatch), Azure, Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins), Microservices, Serverless Architecture, Vercel

Professional Experience

Senior Full-Stack Engineer

01/2024 – 12/2025 | Houston, TX

Folium AI

- Led development of a scalable AI agent marketplace that enables developers to publish agents and businesses to discover, test, and adopt AI solutions for real-world use cases, accelerating time-to-value for both creators and users.
- Built a high-performance, SEO-friendly frontend using Next.js and TypeScript, improving discoverability of AI agents and increasing user engagement through fast, intuitive browsing and execution flows.
- Designed and implemented NestJS backend services to support agent lifecycle management, voting workflows, and marketplace automation, ensuring platform reliability as user activity scaled.
- Leveraged Supabase for authentication, data persistence, and real-time updates, reducing backend complexity while enabling rapid feature iteration.
- Implemented Bull queue-based background processing to handle compute-intensive tasks such as text embedding generation, powering semantic search and recommendations that improved agent discovery and relevance.
- Integrated Letta Cloud to host and execute AI agents directly on the platform, enabling users to run agents before voting, increasing trust, transparency, and conversion from browsing to adoption.
- Improved platform retention and marketplace liquidity by aligning incentives between users and developers through transparent ranking and execution-based evaluation.

Full-Stack Engineer

02/2022 – 11/2023 | Arlington, VA

Five Jars

- Contributed to the development of a cloud-based healthcare SaaS platform designed to support clinical and administrative workflows for behavioral health providers.
- Built and maintained high-performance frontend features using React, focusing on modular architecture, responsiveness, and intuitive user experiences for multi-role users.
- Developed and enhanced Node.js backend services, supporting secure APIs, role-based access control, and scalable service integration.

- Acted as a primary code reviewer, enforcing engineering best practices that reduced technical debt, improved system scalability, and increased development velocity, enabling faster and more reliable product delivery.
- Owned deployment execution and release coordination across AWS infrastructure (EC2, RDS, S3, CloudWatch), ensuring stable production releases, high system reliability, and minimal downtime.
- Integrated third-party services including SMS messaging, mapping/location services, and email systems to deliver unified communication and scheduling capabilities.
- Collaborated with product managers, designers, and QA to translate complex healthcare workflows into maintainable technical solutions.

Full-Stack Developer

08/2019 – 12/2021 | New York, NY

Codment

- Developed a real estate presentation platform that allowed users to explore properties through immersive 360-degree virtual tours, reducing the need for on-site visits.
- Engineered a dynamic and responsive front-end interface using HTML, CSS, and jQuery, enhancing user engagement and visual clarity across devices.
- Utilized SVG Canvas to render interactive property maps and floor plans, providing users with an intuitive spatial understanding of each unit.
- Integrated a custom Flash-based panorama player to deliver seamless virtual walkthroughs, improving the property browsing experience.
- Built server-side architecture with Laravel, enabling modular content management, secure data handling, and clean URL routing for improved SEO performance.
- Collaborated with designers and stakeholders to align technical execution with user experience goals, delivering a polished and high-performing product within deadlines.

Frontend Developer

06/2017 – 07/2019 | San Francisco, CA

Squareboat

- Developed and launched an interactive financial dashboard to visualize key metrics using React and D3.js for dynamic data visualization
- Built an advanced filtering system for tailored investment analysis, allowing users to drill down into specific financial metrics
- Implemented interactive charts and dynamic visualizations, increasing user engagement by 25% and accelerating insight discovery.
- Optimized UI responsiveness and performance, improving page load times by 30% and ensuring a seamless experience across desktop, tablet, and mobile devices.
- Collaborated with designers to create intuitive and accessible interfaces used by thousands of end users, improving overall usability and satisfaction.

Education

Bachelor of Computer Science

08/2012 – 05/2016 | Pasadena, CA

California Institute of Technology
